**Subject:** RE: EPA comments on 2012 Draft IR - request for Kenai River turbidity data

Drew,

In response to EPA comments on the 2012 IR I have created a folder containing all the raw Kenai River turbidity data collected during the 2008-2010 time period. The turbidity data can be found in the following folder on the statewide S drive:

<\\An-svrfile\groups\Water\WQ\NPS\Waterbodies\Kenai> Waterbodies\Kenai River\Turbidity\EPA submittals\_2012 IR

The files in this folder contain all the raw turbidity data collected by the KWF either under contract or grant during the 2008-2010 time period. The actual raw files we received from KWF contain other WQ parameters in addition to turbidity - the other WQ parameter data were removed. No turbidity data points have been removed (contains all turbidity data including outliers).

Tim

Hi Drew,

Here are EPA's comments. Thanks so much.

jill
